COURSEWORK / SKILLS

- Object-Oriented Programming
- Data Structures & Algorithms
- Front-End Web Development

PROJECTS

Filmo — HTML, CSS, JavaScript GitHub ([Link](#))

November 2024

- Built **Filmo**, a web-based video player application using HTML, CSS, and JavaScript.
- Implemented functionality to play videos directly from local files with an intuitive interface.
- Developed user-friendly controls to enhance the video playback experience.

GharBanao — React.js GitHub ([Link](#))

March 2025

- Developed **GharBanao**, a responsive and modern real estate website using React.js, focusing on clean UI and smooth user experience.
- Applied **component-based architecture** to organize code efficiently and promote reusability.
- Implemented a **project showcase section** where users can view previous construction projects with images and descriptions.

Invoicely — HTML, CSS, React.js GitHub ([Link](#))

March 2025

- Built **Invoicely**, a responsive invoicing web app enabling shopkeepers to create, manage, and download professional bills from a sleek and intuitive interface.
- Designed and developed using **React.js** with a component-based architecture, managing item search, quantity input, and dynamic invoice rendering with real-time state updates.
- Integrated **PDF export (jsPDF)** and **browser print functionality** for seamless invoice generation, sharing, and record-keeping.
